

LUBRILAM 6630 I

Rolling

Ready to use rolling fluid for aluminium

APPLICATION

- Aluminium rolling fluid with a well-balanced additivation.

PROPERTIES

- Additivation "alcohol + ester" type
- Handling great facility
- No problem with low temperature.
- Good lubricity
- Base fluid with a very short cut
- All components answer to **FDA 21 CFR § 178.3910** and § **178.3570** and so they **CAN COME INTO CONTACT WITH FOOD**

Typical Characteristics

Methods	Determinations	LUBRILAM 6630 I
Visual	Aspect	Clear
ASTM D 4052	Density at 20°C	0,800
ASTM D 445	Viscosity a 40°C	2,0
ASTM D 445	Viscosity at 20°C	2,95
ASTM D 92	Flash point P.M.	93
ASTM D 94	Saponification number	1
ASTM E 326	Hydroxyl number	18

Above characteristics are mean values given as an information.
